An Ecosystem of Health Disparities and Minority Health Resources

Visualize data and locate information critical to understanding minority health, health disparities and their determinants. Find and submit interventions and resources to design, implement, and evaluate evidence-based interventions to improve minority health and reduce health disparities.

The Business Case for Racial Equality (A Strategy for Growth)

This report seeks to expand the narrative associated with racial equity by adding a compelling economic argument to the social justice goal. Beyond an increase in economic output, advancing racial equity can translate into meaningful increases in consumer spending, as well as federal and state/local tax revenues, and decreases in social services spending and health-related costs.

Kelly Report: Health Disparities in America

America cannot truly be a healthy nation until we cure our nation of health disparities and address the underlying social determinants that cause them. Many of the gaps that exist in public health are shaped by generations of cultural bias, injustice, and inequality. Today in America, minorities experience higher rates of infant mortality, HIV/AIDS, and cardiovascular disease than Whites, and substantial differences in disease incidence, severity, progression, and response to treatment.

Minority Health Activities

BMHA collaborates with a diverse group of professionals who are dedicated to understanding and improving health inequities that specifically challenge minorities and the underserved populations in Louisiana. Partnerships are established with community-based organizations,
